SUMMARY

Jira and Confluence Administrator with 4 years of hands-on platform ownership at an enterprise scale. Built and ran a centralized Atlassian Cloud environment from the ground up, covering Jira Software, Jira Service Management, and Confluence for 300+ users across 20 departments. Known for getting into the details of what teams actually need, building systems that hold up over time, and cleaning up what breaks when others try to go around the process. JQL is second nature. Reporting, governance, and automation are where most of the real work happened.

CORE SKILLS

Platforms: Jira Software, Jira Service Management, Confluence Cloud, Salesforce CRM

Technical: JQL, SQL, Jira Automation, Microsoft Excel

Administration: User lifecycle management, permission schemes, access governance, ITSM configuration

Reporting: Executive dashboards, JQL-based reporting, custom filters, cross-team metrics

Other: Requirements gathering, stakeholder communication, technical training, process documentation

EXPERIENCE

Jira & Confluence Administrator (Atlassian Platform Owner)

11/2021 - 01/2026

Associated Volume Buyers Inc. Sacramento, CA

- Owned a centralized Atlassian Cloud environment end to end, supporting 300+ users across 20 departments and 25 cross-functional teams.
- Built and maintained 55+ Jira projects, including roughly 25 Jira Service Management service desks, each configured with custom workflows, SLAs, request types, queues, and approval processes tailored to the team using them.
- Designed and built 100+ automation rules that cut manual administrative work by roughly 53%, including fully automating recurring content generation for SEO and building an intake service desk that auto-generated and routed linked tickets across department projects.
- Administered Confluence Cloud end to end, including space governance, permission structures, page templates, and a Jira-integrated knowledge base teams could actually use for self-service.
- Sat with stakeholders across the organization to understand what they needed, documented requirements clearly, and turned them into working system configurations without handing it off to someone else.
- Built executive dashboards and pulled custom reports using advanced JQL and Excel, giving senior leadership regular visibility into project health, release progress, and service performance.
- Managed platform upgrades from planning through regression testing to production, keeping disruption minimal and stakeholders informed.
- Evaluated and managed Atlassian Marketplace apps, including compatibility testing, performance impact, and ongoing optimization.
- Led user lifecycle management and role-based access governance to keep the environment secure and compliant.
- Trained teams across the organization on Jira, JSM, and Confluence as they onboarded, and built reference documentation so teams could self-serve without creating a support burden.
- Supported Salesforce CRM as a secondary responsibility, handling user management, field configuration, basic reporting, and contributing to a Jira-Salesforce integration project using Sinergify.

E-Commerce Manager

04/2019 - 10/2021

Associated Volume Buyers Inc. Sacramento, CA

- Developed and managed the company's e-commerce strategy, improving online product presentation and aligning offerings with customer purchasing patterns.
- Analyzed customer data to spot trends and adjust sales tactics, then trained staff on platform best practices to support execution.
- Collaborated with IT to troubleshoot site issues, and built training materials for new hires covering merchandising and product knowledge.

Brand Manager / Category Merchandiser

10/2017 - 03/2019

Build.com Chico, CA

- Managed vendor and manufacturer relationships to keep product additions and catalog updates moving without bottlenecks.
- Monitored site and sales data to identify growth opportunities, then worked across departments to align marketing and merchandising around those findings.
- Improved category organization and brand visibility through cross-functional coordination with marketing and data teams.

Data Quality Assurance Lead

09/2016 - 10/2017

Build.com Chico, CA

- Used SQL to compare, update, and insert product data records, and pulled management reports that informed decisions about catalog quality and team output.
- Led a team of Data Specialists, delivering feedback, running training sessions, and reviewing completed work for accuracy, formatting, and consistency.

Data Specialist

08/2015 - 09/2016

Build.com Chico, CA

- Compiled and formatted manufacturer product data for site listings using Excel, researching details and pricing to support accurate, complete catalog entries.
